WHY THIS CASK IS UNUSUAL AT THIS PRICE POINT

The name. Single malt brought back to the city of Glasgow. The Glasgow Distillery was founded in 2015, marking the return of single malt production to the city of Glasgow after a long absence.

The maturation. Approximately 4 years are already done, so part of the hold is behind you.

The entry economics. At 385 bottles per cask the spirit cost is £7.41 per 70cl bottle before tax, the level you enter at.

02 / PRICING & OUTLOOK

Pricing & Outlook

What you pay against what the bottles sell for, and where the value can go.

This cask comes to the platform at £23 per litre of alcohol, a total of approximately £2,852. That works out to 385 bottles at a spirit cost of £7.41 per 70cl bottle before tax. The bar below sets that figure against comparable Glasgow bottlings selling at retail today, which reach £70 per bottle.

Retail bottle (high comp)

**£70****This cask, per bottle****£7.41****£7.41 SPIRIT COST · vs £70 RETAIL BOTTLE**

The bottles behind that comparison, live at retail today:

BOTTLE (INDEPENDENT)	RETAILER	LIVE RETAIL
Glasgow entry comparable	Specialist retail	£60.00
Glasgow mid comparable	Specialist retail	£70.00

Comparables run from £60 to £70 per bottle. That spread is the room a cask has to grow into over a longer hold.

The outlook

Not a forecast. The bottle reference simply shows the ceiling that long holds of this distillery move toward, value at exit depends on demand and condition.

04 / PLATFORM PRECEDENT

Platform Precedent

Clients have already bought and exited this exact product on the platform.

This is not a new, untested line. 8 clients / 20 casks of this exact product have already completed a full buy-and-exit cycle on Decant Index. Across those exits the average realised return was 19.2% over an average hold of 28 months.

Reading the data

These figures are realised, not modelled: they reflect the difference between what clients paid and what they received on exit for this same product. They are historic and specific to those casks, and do not guarantee the same outcome for stock bought today.

Annual return is the average total return annualised over the average hold.

Recent-vintage casks tend to show shorter holds and lower totals simply because they have had less time to mature, so read the figures together.

Past performance does not guarantee future returns. Short holding periods can be impacted by storage and insurance costs and price volatility. Each cask has a recommended minimum holding period.

05 / THE DISTILLERY

The Distillery

Single malt brought back to the city of Glasgow.

The Glasgow Distillery was founded in 2015, marking the return of single malt production to the city of Glasgow after a long absence. It is part of a wave of new urban Scottish distilleries reconnecting whisky-making with the cities that built the industry's trade, and it has earned strong critical reviews for the quality of its spirit in a short space of time.

The distillery produces a range of styles, including unpeated, peated and even a triple-distilled expression, showing real ambition and versatility for a young operation. As a modern craft distillery with a clear city identity and a growing reputation, Glasgow represents the newer, fast-rising end of the Scotch market.

The cask offered here is a ex-bourbon fill, approximately 4 years matured, held in HMRC-bonded storage at Alloa in Scotland. It comes to the platform at £23 per litre of alcohol, roughly £2,852 per cask, a spirit cost of £7.41 per 70cl bottle before tax.

1

A city comeback story

Glasgow's return of single malt to the city after decades is a clear, marketable narrative that resonates with buyers who like being early to a rising name.

2

Critically well received

Despite its youth, the distillery has earned strong reviews, a signal that the liquid quality is there to support the brand's growth.

3

Early-stage upside

As a young distillery still building its reputation, Glasgow offers entry at the ground floor of a name that is actively gaining recognition.

IMPORTANT INFORMATION

Past performance does not guarantee future returns. Short holding periods can be impacted by storage and insurance costs and price volatility. Each cask has a recommended minimum holding period. Cask investment involves capital at risk and is not suitable for all investors. The value of cask whisky can fall as well as rise, and you may not get back the amount originally invested. Decant Index is not a regulated investment adviser. Information in this briefing is for general information only and does not constitute a personal recommendation, an offer, or financial advice. Independent advice should be sought where appropriate. Tax treatment depends on individual circumstances and may change. Annualised return figures are based on verified transactions on the Decant Index platform and are not a guarantee of future performance. Comparable bottle pricing is shown for context only and does not imply an exit value for the cask. Live retail pricing and cask listings are correct as at the date of this briefing and may change. Bottle yield is an estimate based on stated cask volume, ABV, and bottling at 46% ABV; actual yield will depend on angel's share, regauging, and bottling decisions.
